SUMMARY

Full-stack developer building AI-powered applications end-to-end, from FastAPI and PostgreSQL backends to LangGraph-based agent workflows and React frontends. Experienced designing Retrieval-Augmented Generation pipelines with vector embeddings, integrating LLMs with structured, validated outputs, and shipping JWT-secured REST APIs. Strong problem-solving foundation with 500+ LeetCode problems solved, and quick to pick up new tools in fast-paced, ownership-driven teams.

WORK EXPERIENCE

Product Development Intern, Plexis Private Limited

May 2026 - Present

- Build and ship product features end-to-end using the MERN stack (React, Node.js, Express, MongoDB) within a cross-functional, Agile team.
- Write technical documentation and execute test cycles across the development lifecycle; iterate on features based on QA and stakeholder feedback.
- Work directly with designers and senior engineers to translate product requirements into implemented, tested features.

PROJECTS

IntervueX — AI Interview Practice Platform

[GitHub](#)

- Designed a LangGraph agent workflow (state, nodes, conditional edges) that runs adaptive, multi-turn mock interviews and adjusts question difficulty from the candidate's live responses.
- Built an asynchronous FastAPI backend with SQLAlchemy 2.0, PostgreSQL + pgvector, and Alembic migrations to store resume/skill embeddings and power profile-grounded question generation.
- Integrated multi-provider LLM routing (Groq, Anthropic Claude, offline fallback) with structured JSON outputs validated via Pydantic for reliable interview scoring.
- Implemented JWT authentication and pypdf resume parsing; built the frontend in React 19 + Vite + Tailwind CSS 4 with Recharts dashboards.

Technologies: Python, FastAPI, PostgreSQL, pgvector, SQLAlchemy 2.0, Alembic, LangGraph, Groq, Anthropic Claude, Pydantic, JWT, React 19, Vite, Tailwind CSS 4, Recharts

RepoPilot — GitHub Repository Q&A Engine

[GitHub](#)

- Built a Retrieval-Augmented Generation pipeline: ingests any public GitHub repo (GitPython), chunks source files, and generates local embeddings via Sentence-Transformers — no external embedding API dependency.
- Implemented vector similarity search on PostgreSQL + pgvector (Supabase) via asyncpg, powering a grounded Q&A endpoint on Groq's LLM, hardened with Tenacity retry logic.
- Built a versioned, async FastAPI backend and a type-safe React 19 + TypeScript frontend; tested with Pytest, pytest-asyncio, and an HTTPX ASGI test client.

Technologies: Python, FastAPI, PostgreSQL, pgvector, asyncpg, SQLAlchemy 2.0, GitPython, Sentence-Transformers, Groq, Tenacity, React 19, TypeScript, Vite, Tailwind CSS 4

ChatSphere — Real-Time Chat Application

[GitHub](#)

- Built a real-time chat app on Socket.io WebSockets: private messaging, group chats, online/offline presence, and persistent MongoDB message history.
- Added image/media sharing, an emoji picker, and voice-call integration; secured with JWT auth and a Node.js backend tracking concurrent socket connections via an in-memory Map.

Technologies: React.js, Node.js, Express.js, Socket.io, MongoDB, JWT

EDUCATION

B.Tech in CSE — RGUKT IIIT Srikakulam

2023 - 2027 | CGPA: 8.9/10

Pre-University Course — RGUKT Srikakulam

2021 - 2023 | CGPA: 9.7/10

TECHNICAL SKILLS

- Languages:** Python, JavaScript (ES6+), TypeScript, Java, SQL, C, HTML5, CSS3
- AI / LLM Engineering:** LLM Integration (Groq, Anthropic Claude), LangChain, LangGraph, Prompt Engineering, Structured Outputs (Pydantic, JSON Schema), Tool / Function Calling, LLM Evaluation
- RAG & Vector Search:** Retrieval-Augmented Generation (RAG), Embeddings, Sentence-Transformers, pgvector, Semantic Search
- Backend & APIs:** FastAPI (Async, Dependency Injection, Pydantic), Node.js, Express.js, Socket.io, REST API Design, JWT Authentication, RBAC
- Databases:** PostgreSQL, pgvector, SQLAlchemy 2.0, MongoDB, Mongoose ODM, SQLite
- Frontend:** React 19, TypeScript, Vite, Tailwind CSS 4, React Router, Recharts
- DevOps & Testing:** Docker, CI/CD, Git, GitHub, Pytest, pytest-asyncio, Vitest, React Testing Library, Postman

CERTIFICATIONS & ACHIEVEMENTS

- NPTEL Elite: Foundations of Deep Learning (IISc Bangalore, 78%) and Object-Oriented System Development with UML/Java/Patterns (IIT Kharagpur, 72%) — Jan-Apr 2026.
- Python Programming — Udemy (Core Python, Data Structures, OOP, project-based learning), May 2025.
- Built rapid full-stack/AI prototypes under 24-hour deadlines at RGUKT Technical Fest hackathons.
